The image shows two brochures from PAML. The top brochure is titled "Drug Panels" and lists four panels: PM1 (Pain Management Panel 1), PM2 (Pain Management Panel 2), PM3 (Pain Management Panel 3), and PM4 (Pain Management Panel 4). Each panel lists various drugs tested, such as Alcohol, Acetaminophen, Morphine, and others. The bottom brochure is titled "NEW Pain Management Panel (PM5)" and describes a high-resolution screen for 16 drugs, including Oxycodone, Hydrocodone, and others. It also lists benefits like low levels of false positives and confirmatory testing for specific drugs. Both brochures include contact information for PAML.
