PHYSICIANS PORTAL

site-map & proposed improvements

CONTACT US

AION

2- Make the user account info, once logged in, more prominent with the option to add a physician's logo as a "profile picture" that would display when logged in. (This could also be where the Physicians logo is pulled from for the reports?)

Having credentials prominently displayed personalizes the portal. Having the ability to add their logo will further customize their experience. It could also provide us with the logo for future use, as mentioned for the patient reports.

3- Have a contact page, on the site, instead of linking out the AION site. (This would also include the "contact us" from the log in screen.)

Leading a user away from the site they were on can lead to confusion and a less than favorable experience. Creating a portal contact page would help improve the site flow and the user experience.

When a user clicks on a tab, they expect to see a page display. (Just as it does with reports and help.) The current site doesn't function like this.
